# Functionalities tailored to your business needs :

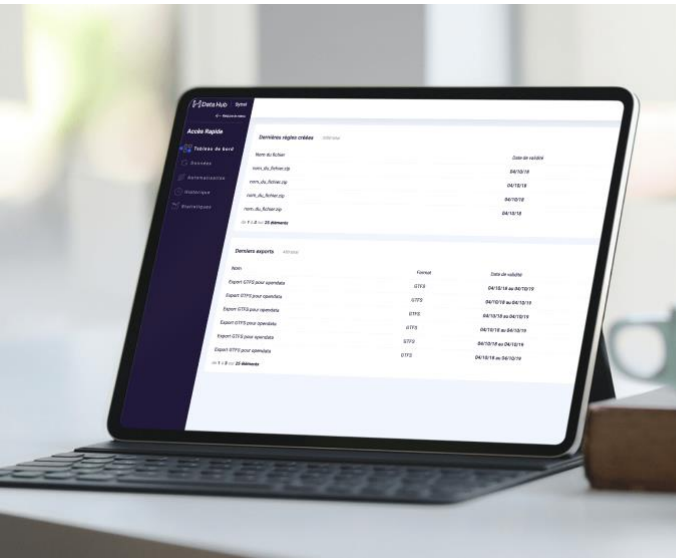

## Creating disruptions

Plan ahead for anticipated disruptions such as job traffic, sporting events, etc. Select broadcast dates and display time on your media to inform your users.

## Unexpected disruptions

Create unexpected disruptions with just a few clicks thanks to our dedicated form allowing quick input thanks to the creation of dynamic messages to support the input operators.

## Media

Choose the information transmission channels: websites, mobile apps, texts, emails, push notifications, Twitter, etc.

## Network status

Monitor the status of the entire network with business dashboards representing the status of traffic on the ground.

## Impact on the calculator

Disseminate disruption information directly in the contextual route and timetable searches.
